1. INTRODUCTION

Drug abuse is a pervasive problem of global concern that many human societies. This phenomenon reflects the image of an individual, whereas the risk of health and security of a socio-economic problem in many countries [1]. Addiction word in the sense of character to something Dehkhoda [2-4]. Today, in modern medicine due to the failure of the word addiction and dependency to Mvadaftlah drug abuse is the term used by humans as a result of Shvd.mfhvm. Abuse of a chemical, physical and psychological terms depend on it so that the relaxation and enjoyment of the drug, and the drug reaching the hangover and feeling of agitation and unrest with the Kian F [5].

The participants in the discussion stated that the family will not have to pay the price, very devastating. If a member of the family in this difficult matter, the whole family is affected.

This is a family problem because the strength, stability, unity, and mental and physical health affects family. Children in particular are most affected by this problem.

Surely someone overnight from an ordinary person does not become an addict. This process has several steps. With this sad development, there are other factors that cause family members.

2. CONCLUSION

That addiction is a problem for the individual and for his family no longer an issue. Emotional maturity at risk and the rise of the man who is able to rise makes a person humble, helpless, unable to manage his own life, indifferent to the feelings of responsibility v events and also events that cutting passes.

That addiction is a problem for the individual and for his family no longer an issue. He not only their existence to society could be huge capital at risk but also the time of his wife and children to ruin.
